

Tour of WI Crop Innovation Center 8520 University Green Middleton WI 53562 10 AM-12 Noon, April 16, 2024

In 2017, Monsanto donated its 4.5-acre research campus in Middleton, WI to UW-Madison. Using these facilities, CALS has created a center to produce high throughput transgenic crops as well as disease-free seed potatoes for Wisconsin's potato industry. Demeter members and guests will have an opportunity to tour the center and learn about this innovative crop research and development.

Participants will meet on April 16 at 10 AM at the entrance of the Wisconsin Crop Innovation Center, 8520 University Green, Middleton WI 53562. The tour is expected to last about 2 hours.

This event is *free*, but we request that you **contact Sally Leong at sallyleong6@gmail.com or 608-383-9388 by April 12** to indicate your interest in attending. Our hosts would like to know the number of people to expect.
